Introduction

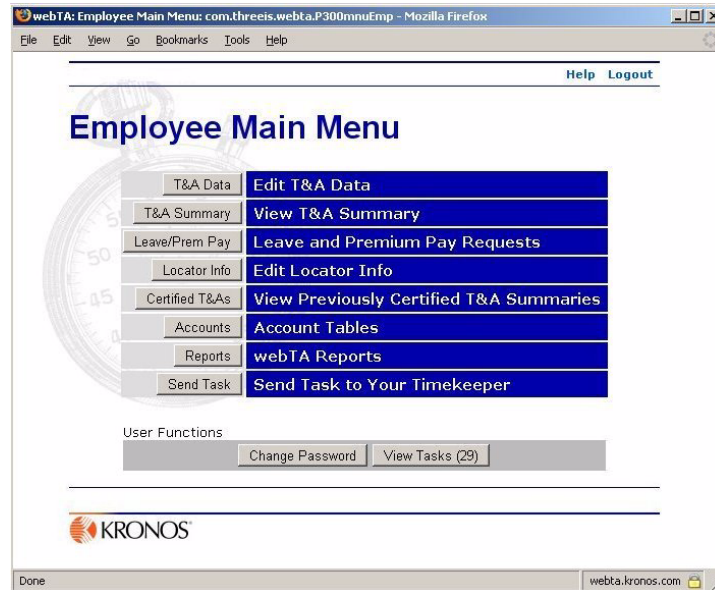

The purpose of this document is to provide employees information needed to use webTA for fulfilling Employee role job functions. It is not intended to provide you with information about basic procedures such as logging in, searching for employees, or getting help. For basic information, see the document *webTA 3.6 Basics*.

IMPORTANT! This document contains graphical representations (“screen shots”) of many of the browser pages that you will see as you use webTA. These screen shots may not appear exactly like the pages on your own screen. They may differ in some ways. However, the screen shots in this document are similar enough to what you will see so that they help you work through the procedures and understand the examples in the documents.

Using webTA, employees can:

- Enter T&A data
- View a summary of your current pay period time and attendance information
- Submit leave and premium pay requests to your Supervisor
- Maintain your contact information, including work address, phone number, and e-mail address
- Request that webTA validate your current pay period time and attendance information
- View your historical time and attendance information
- Run pre-defined reports
- Change your password
- Submit requests to your Timekeeper

The Employee Main Menu page opens after you log in.

Entering and modifying T&A data

The T&A Data page is used to enter time and attendance transactions.

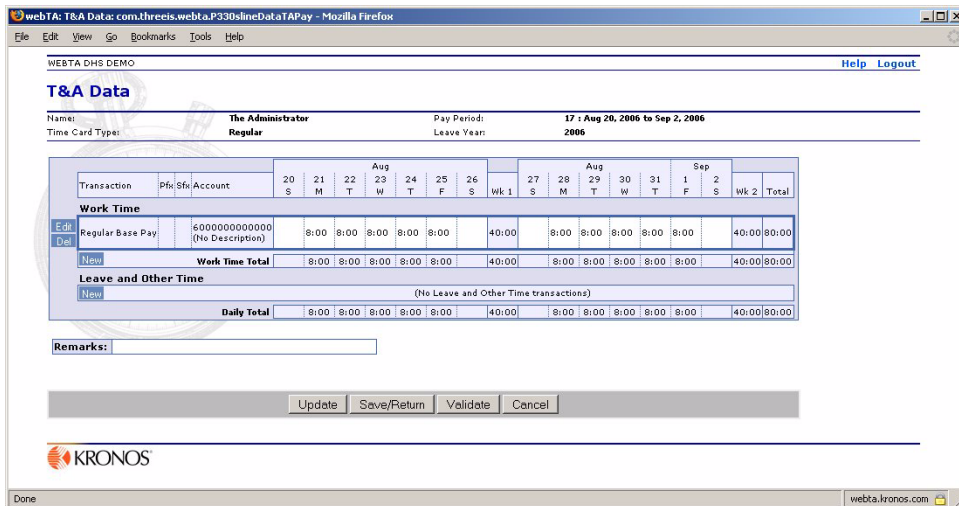

Open the page by clicking **T&A Data** on the Employee Main Menu page.

Transactions are sorted into work time transactions and leave and other time transactions.

To add a work time transaction:

1. If you have not already done so, open the T&A Data page by clicking **T&A Data** on the Employee Main Menu page.

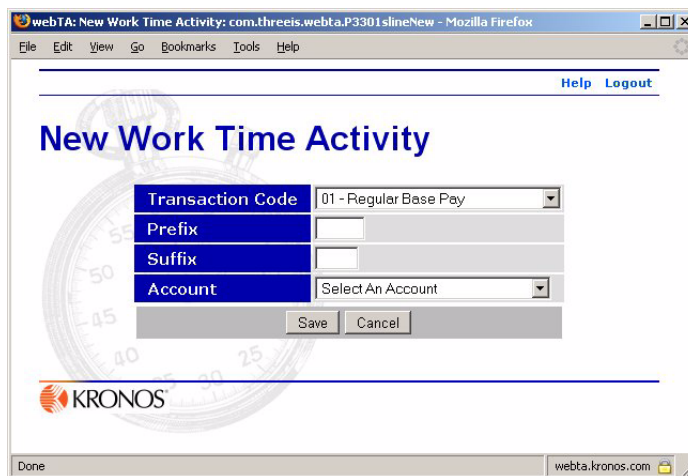

The T&A Data page opens.

The **Work Time** section of the T&A Data Entry page contains your time and attendance work time transactions.

2. Click **New** in the **Work Time** section.

The system returns you to the T&A Data page. The work time transaction you added appears in the **Work Time** section.

To enter work hours:

1. If you have not already done so, open the T&A Data page by clicking **T&A Data** on the Employee Main Menu page.

2. Type in your time under the appropriate date in the appropriate section, Work Time or Leave and Other Time.

Enter daily time in hours and minutes in 15-minute increments by typing the number of hours, a colon, and the number of minutes (HH:MM). Or you may enter the hours, a period, and a decimal fraction.

Time entered in these ways are converted to hours and minutes, rounding to the nearest 15 minute increment when updated or saved. For example, entering 3.5 converts to 3:50 hours, and 7:7 converts to 7.00.

3. If you want to continue working on the T&A Data page, click **Update**.

- OR -

If you are finished entering time, click **Save/Return**.

NOTE: If you select or change the transaction information that is same as another line already present in the spreadsheet, the hours for the two transactions are summed and displayed as a single transaction.

Validating and affirming your T&A data

When you are finished entering your T&A data, the data validation process must be initiated by you or your Timekeeper. By validating the data, you are attesting to the accuracy of your T&A record. Your Supervisor cannot certify the T&A data until it has been validated.

To validate your T&A data:

1. Open your T&A Data page by clicking **T&A Data** on the Employee Main menu.
2. Click **Validate**.
Your T&A Data summary page opens.
3. Click **Affirm**.
webTA checks the T&A data against OPM federal pay rules and regulations.
 - If there are any errors or other problems, webTA lists them on the Validation Summary page:

- If only warning messages are generated, you see the warning messages, but the data is validated.
- If there are no error messages, webTA tells you that the data was validated successfully.

About validation errors and warnings

Errors are triggered when there is a clear failure of the T&A data to be validated, based on the validation rules. Errors are indicated by the word “ERROR” in red, and include a description of the problem that is preventing your T&A data from being validated.

Warnings are triggered when the system suspects that there may be a problem, but there is not enough information to be sure. Warnings are indicated by the word WARNING, along with a description of the possible conflict.

Warnings will not prevent you from validating the time card, but should be reported to your Supervisor to be resolved at a future date.

Errors must be corrected before your Supervisor can certify the data. Warnings may or may not need to be corrected.
